

What Is Lootex?

Our mission is to make people's virtual assets real by providing a trading platform built on the blockchain. Lootex creates a fraud-free, cross-nation, transparent, and safe cryptoitem auction house with connecting peer-to-peer on the basis of decentralization. Using Lootex, anyone can create, buy or sell its cryptoitems through smart contracts in a simple process without the risk of being scammed. Lootex frees virtual items, turning them into real world asset.

Good for Whom?

For Gamers

- Get true ownership of the virtual items
- Be free to show / buy / sell items in a simple & secure way

For Developers/ Publishers

- Launch Initial Item Offerings to crowdfunds for game development
- Get additional revenue (maintenance fee) from users' transaction

For Ecosystem

- Arouse the potential to build up cross-game items
- Increase the liquidity of cryptoitems

What We Do?

Lootex's Forge enables developers to create cryptoitems or find items to support their games. And Vault provides a simple and quick way to showcase cryptoitems for players. More importantly, Marketplace connects players and developers to a larger community. All these make the ecosystem energetic and ever-advancing.

Forge

Protocol for items on chain

- Quick on chain
- Smart Contract Generator (Initial Item Offerings, Scarcity, White List, etc.)
- Exclusive: Gas-free airdrop

Vault

Crypto Wallet
